COMMAND CHAINS

A Command Chain is a group of commands executed in a sequence. You can trigger a Chain from Quick Commands, or assign it a custom Keyboard Shortcut or Mouse Gesture.

Some commands support parameters and placeholders. Placeholders can be used through Context Menus on websites, images and videos:

- Selected Text: {selection}
- Clicked Link: {link_url}
- Active Page URL: {page_url}
- Active Page Title: {page_title}
- Source Element URL: {src_url}

PRIVACY

☒ Enable Proton VPN for Vivaldi

With Proton VPN for Vivaldi, your web traffic is encrypted between you and Proton and then sent forward to the website you requested. This stops your ISP and other parties on your local network from tracking your traffic and prevent advertisers from knowing the true origin.
